Web Development

Track 01: AIT Hiring Site

Create a website where AIT alumni can post any internship opportunity and hire students. The students can see these opportunities and apply for it, They can also chat to the alumni if they're interested.

Milestones:

1. Students and alumni can create a profile and login using their AIT email address.
2. Alumni will be able to post videos, photos, text and it will be visible to everyone. Also can like, comment and share.
3. Students and alumni can chat through messages.

Web Development

Track 02: Photography Services Providing Site

Create a webpage where you can display your photographs. A user can login in this web app and see your posted photos. He/She will also be able to like, comment and rate the authenticity of these photos. Clients should also be able to book your services for their wedding, birthday and parties.

Milestones:

1. Users can create new accounts and login.
2. Should show cumulative rating on photos and can book services.
3. Easy to reach and contact with service provider .

Notes:

- 1) Additional points will be given for good UI/UX.
- 2) Additional points for secure login/logout authentication
- 3) Additional points for adding filter and sort by options for searching through data.
